Use Case for creating an emergency fundraiser

Use Case Name:

Emergency Fund Raiser on Charity Wallet Site

Identifier:

ER-001

Goal:

To raise funds from donors to provide immediate help and support to all the people in need.

Preconditions:

- The emergency fundraiser section is available on the website.
- The donor has access to the internet and a valid payment method.

Main Flow:

- The donor visits the emergency fundraiser section on the charity wallet website.
- The donor enters the amount of money they wish to donate.
- The donor confirms the donation.
- The emergency fundraiser receives the donation and transfers the funds to an NGO.
- The NGO acknowledges receipt of funds.
- The emergency fundraiser sends a receipt of the donation to the donor.

Alternate Flow:

- If the donor does not have a valid payment method, they cannot donate.
- If the provided information is invalid, the system must display an error message so that the user corrects the entered information.

Post Conditions:

- The donor receives a receipt of the donation.
- The NGO receives the donation and acknowledges the receipt of funds.
