Charity Wallet

Software Engineering Project

Made by: Hirmi Bhupendra Patel (202101151)

Use Case for creating a campaign

Use Case name:

NGO Profile Setup for Charity Wallet Website.

Identifier:

UC-2

Precondition:

- The user must be a registered NGO.
- User has valid login credentials for the charity wallet website.

Main Flow:

1. The NGO logs in to the charity wallet website.

2. The NGO navigates to the profile setup section.

3. The NGO enters the organization's Name, Vision, and Address.

4. The NGO adds Bank details.

5. The NGO uploads Profile Photos and Images of Previous Work.

6. The NGO reviews the entered information for accuracy.

7. The NGO submits the profile for verification.

Alternate Flow:

- The system prompts the NGO to provide the required details if any mandatory information is missing or invalid.
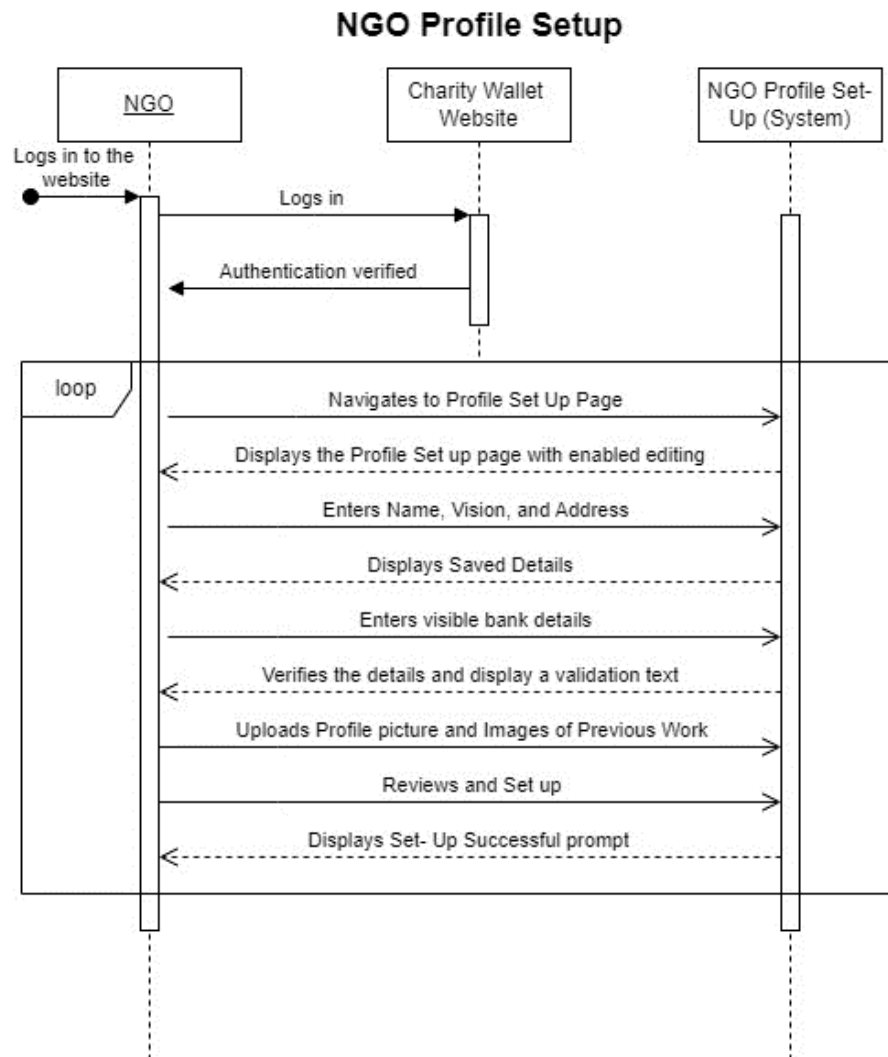

Postcondition:

1. The NGO profile is stored in the charity wallet database.

2. Profile information is visible to website visitors.

3. The NGO is notified of the profile verification status.
